

# Complex Challenges Call for a Nimble Approach

## Achieve your clinical trial objectives *faster*

We bring more global points of service than any other central lab, with more than 5000 validated tests, a thriving group of scientific and technical experts, and a project management team with deep experience. While LabConnect is growing, our focus on our customers and delivering with speed and agility remains our top priority, with several models in place designed specifically to reduce overall timelines.

We pride ourselves on being nimble. Our tailor-made, timely, and flexible solutions help our clients accelerate their drug development milestones. No matter the size or complexity of your clinical trial, our central lab services will help you ensure success. And that means you can get life-changing medicines in the hands of patients *faster*.

# Be nimble, be quick

## Six case studies in six minutes

Because every clinical trial looks different, every LabConnect solution looks different. Here are just six of the many examples in which we've helped our clients accelerate their drug development milestones with our agile approach.

1

### The **Need:**

Hit an exceedingly tight deadline for a global vaccine program enrolling 7000+ patients

### The **Nimble:**

LabConnect coordinated everything from pre-built kits to dedicated accessioning teams to site management with crystal clear query processing

### The **Noteworthy:**

Tight coordination led to an early lock of the clinical database

2

### The **Need:**

Fast-track a study by getting custom collection kits on site in 8 weeks

### The **Nimble:**

LabConnect set an aggressive timeline and managed all parties to work in lockstep

### The **Noteworthy:**

Custom kits delivered to sites a week earlier than committed

Be nimble, be quick

3

**The Need:**

Provide visibility into status of sample collections, shipments, and accessioning for extremely short stability window

**The Nimble:**

LabConnect engaged hyper-tracking for both storage AND safety samples simultaneously

**The Noteworthy:**

Clients gained pinpoint visibility into timing of results allowing them to make quicker decisions

4

**The Need:**

Collapse 48 hours for global transit into 24 hours to avoid missing stability window

**The Nimble:**

LabConnect identified, validated, and partnered with labs that were in the same countries as the collection sites. Our logistics team then identified and secured ad-hoc shipping lanes for the quickest transit times

**The Noteworthy:**

Every sample was received within 24 hours and client retained access to the new lab partners for future studies

**48**  
Hours

**24**  
Hours

eliminating

5

**The Need:**

Get supplies to multiple international sites with different regulations and timelines

**The Nimble:**

LabConnect created a detailed process map for each site's import approval and worked with our logistics partner to ensure seamless handoff

**The Noteworthy:**

Zero wait time for shipping approvals of custom kits

6

**The Need:**

Complete an analytical overhaul of study data for a client whose other vendors couldn't deliver

**The Nimble:**

LabConnect parsed and linked analytical data from a testing lab with demographic data from a CRO to reformat to our client's needs.

**The Noteworthy:**

Delivered on every single mission critical goal, on time and under budget
