

## Functional Service Provider (FSP) Solutions

Quickly get scientific and technical expertise to support your pre-clinical and clinical research needs

### Support services include:

Bioanalytical Project Management

Biomarker Project Management

Biospeciman Management

Vendor Management

In today's increasingly complex world of clinical research, there are more samples collected and more specialized laboratory requirements than ever before. As a result, clinical studies are requiring more and more technical oversight, with additional focus on milestones, expedited timelines and evolving regulatory guidance as well as global logistics and analytical harmonization. Often, clinical team resources are strained without the extra bandwidth and technical expertise to address these evolving study demands.

For over 10 years, LabConnect has supported our clients across all these areas by providing experienced scientific and technical experts with laboratory acumen and project management skills to flexibly fill talent gaps and seamlessly serve as an extension of our client's clinical research teams.

We provide a cost-effective and timely solution for your technical and operational needs. With deep and unmatched experience, LabConnect's team of scientific experts serves as an extension of our clients' clinical teams, quickly coordinating all laboratory related needs and providing end-to-end analytical and logistical solutions. Our infrastructure is built, our experience is robust, and our impact is immediate.

## BIOANALYTICAL PROJECT MANAGEMENT

LabConnect provides subject matter experts (SMEs) to oversee, and project manage all technical and operational aspects of bioanalytical testing outsourced to vendor laboratories. With diverse experience in large and small molecule analytical platforms, LabConnect's FSP Solutions supports the lifecycle of a project, including vendor selection and contracting, assay development and validation, data monitoring, and study closure and regulatory reporting. Our embedded team of experts liaise between your internal study teams and external vendors, providing technical expertise driving analytical readiness, testing milestones, and compliant assay integrity.

## BIOMARKER PROJECT MANAGEMENT

LabConnect can provide functional area experts to project manage technical and operational aspects of biomarker testing outsourced to vendor laboratories, to expedite laboratory selection, assay qualification, data monitoring and CSR reporting. Our embedded staff liaise between your internal study teams and external vendors providing technical expertise driving analytical readiness, assay integrity, and study timelines.

## BIOSPECIMEN MANAGEMENT

LabConnect provides you with experienced biospecimen managers to oversee preclinical and clinical studies, focusing on sample logistics and sample/data discrepancy resolution. Your LabConnect biospecimen manager(s) will act as a hub, facilitating interactions with all internal and external stakeholders, ensuring that all your samples are received and tested, and that data is transferred according to mandated timelines. LabConnect ensures sample integrity by tailoring solutions with a focus on communications, and utilizing client-based or commercial LIMS systems, or manual tracking as needed.

## VENDOR MANAGEMENT

Outsourcing of testing and services has become more common in the clinical trial industry. This trend is due to expedited study demands, increases in the number of studies and complexity of the studies. When a company decides to use outside vendors, implementing expert vendor management is critical. Identifying the appropriate laboratories, qualifying the laboratories to ensure regulatory compliance, and monitoring the laboratories' performance over time is critical to success. LabConnect has extensive experience in providing technical vendor management service to our clients focusing on both analytical and operational processes.

## ABOUT LABCONNECT

LabConnect improves lives by partnering with pharmaceutical and biotech companies, and clinical research organizations (CROs), to accelerate the development of new medicines around the world. An independent, global, one-stop-shop focused on delivering central laboratory services that are tailor-made, timely and flexible to meet the evolving study demands from traditional to increasingly complex trials.
