

# Acceleration Through Operation, Communication, and Coordination

## Extend your team and speed with LabConnect's Functional Service Provider (FSP) Solutions

Today's study demands are complex and ever-changing. You sometimes need to quickly support and extend your clinical trial teams with additional scientific and technical expertise.

**Accelerating pre-clinical and clinical trials around the world with our FSP Solutions.** Support and extend your clinical teams with our scientific and technical expertise. We can quickly coordinate all of your laboratory-related needs, advise on strategies for lab data collection, and provide end-to-end analytical and logistical solutions.

Our global FSP Solutions Team includes scientific experts from A4P — A LabConnect Company. With the expanded geographic reach and expertise, our combined capabilities support pre-clinical and clinical programs. We bring an unparalleled breadth and depth of technical and scientific expertise to support pharmaceutical, biotechnology, and contract research organizations across a broad range of therapeutic areas.

## Scientific Consulting and Project Management

**Support that speeds things up.** With diverse experience in large and small molecule analytical platforms, LabConnect provides project lifecycle support for bioanalytical and biomarker testing that includes:

- Vendor selection and contracting
- Biomarker strategy consultancy in pre-clinical and clinical studies (biomarker selection, sample and testing optimization, data analysis, data monitoring, across multiple therapeutic areas)
- CSR and regulatory reporting (SME including regulatory inspections)
- Assay development, qualification, and validation and trouble shooting
- Data monitoring
- Study close

For additional acceleration our team offers bioanalytical services oversight (PK, ADA, IHC, biomarker activities), study plan and bioanalytical report review, method oversight, data review, troubleshooting, regulatory submission input.

### Scientific Lab Consulting

**Scientific SME support that simplifies.** Our experts have experience with complex protocols and testing profiles.

## Biospecimen Operations

**Your quick and connected hub.** Our experienced biospecimen managers oversee preclinical and clinical studies focusing on sample logistics and sample/data discrepancy resolution. Our strong communication is our backbone. Your LabConnect biospecimen manager(s) will act as a hub, facilitating interactions with all internal and external stakeholders and enabling you with oversight, tracking, data, planning, study plan review and set up, reports/dashboards, sample flow gap analysis, and more.

## Lab Vendor Management

**Oversight under tight timelines.** Outsourcing of testing and services is common in the clinical trial industry and that's why implementing expert vendor management is critical. Our extensive experience in providing technical vendor management services focuses on both analytical and operational processes such as:

- Laboratory quality system evaluation
- Vendor governance
- Laboratory and vendor evaluation
- Vendor operations

**About Us:** LabConnect delivers Central Laboratory Services and Functional Service Provider Solutions tailored to meet your critical clinical trial milestones. For 20+ years, we have helped organizations like yours handle the increasingly complex requirements of the drug development process without missing a beat.
