

Acceleration Through Navigation

LabConnect offers a broad range of testing and capabilities to speed your research

Clinical trials have become more rigorous, specialized, and heterogeneous across the globe. This creates increased pressure and complexity while shrinking the time windows for preparing samples for analysis.

Velocity without losing viability. LabConnect prioritizes access to the right labs, customized to your protocols. We offer robust global harmonization whether working with our labs or yours. Our Global Sample Processing Network (GSPN) provides more locations around the world than any other central lab. We can also perform specialized preparation in-region to ensure precious time isn't wasted.

The world's #1 most comprehensive testing capabilities across a wide range of therapeutic areas:

5K+

VALIDATED
TESTS

- Clinical Pathology
- Biomarker Analysis
- Pharmacogenomics
- Anatomic Pathology
- Molecular Diagnostics
- Analytical Chemistry
- Sample Processing

Lab Samples

Built for speed and to address shipping and standardization challenges

Our global laboratory network gives you access to more points of service than any other central lab – reducing the travel distance of your samples from your investigator sites, driving lower cost and operational efficiencies, and maintaining your sample's integrity. To ensure quality, sample processing harmonization is measured in real-time:

- ◉ PBMC local isolation and cryopreservation, then run centrally; can also be run regionally with LabConnect's FSP oversight to ensure standardization
- ◉ Robust flow cytometry offering
- ◉ DNA/RNA extraction, frozen tumor tissue, FFPE, etc
- ◉ Aliquoting services

→ **Real acceleration. Real results.** The LabConnect team created a comprehensive service package for a client to meet the needs of their dynamic, complex cell and gene therapy study. Working diligently with our specialty labs, the most appropriate assays and testing plans were selected and created to produce quality data while being cost-effective. There were 23 unique assays, 8 specialty labs and, 1 satisfied client.

About Us: LabConnect delivers Central Laboratory Services and Functional Service Provider Solutions tailored to meet your critical clinical trial milestones. For 20+ years, we have helped organizations like yours handle the increasingly complex requirements of the drug development process without missing a beat.
